Languages

German native
English proficient

Programming

Python, C++, Java,
JavaScript, Go,
Smalltalk,
CSS3 & HTML5

Systems, Frameworks & Techniques

Git, Linux, \LaTeX ,
PostgreSQL, D3,
Protobuf, Qt, TDD,
Testing, Prototyping

My goal is to use a combination of **large-scale systems for data analysis and interactive visualizations** to support novel insights and fast exploration of multi-dimensional data. I hope to build visualization systems that use statistical analysis, both for driving visualization recommendation and guiding the user's exploration as well as for supporting richer exploratory analysis.

Education

- since 2013 **University of Washington – PhD in Computer Science & Engineering** Seattle
Advised by Bill Howe and Jeffrey Heer.
Member of the Database Group and the Interactive Data Lab. Research focus on distributed database systems and interactive data visualization.
- 2010–2013 **Hasso-Plattner-Institute – B.Sc. in IT-Systems Engineering** Potsdam, Germany
Bachelor's thesis: *Algorithms for the Visualization of Software System Evolution*.
GPA: 4.0 (1.0 in German system)
Advanced classes on database implementation, visualization algorithms, and logic.

Notable Awards

- 2013–2014 **Fulbright Scholarship** Bureau of Educational and Cultural Affairs, USA
Highly competitive, merit-based grant for international educational exchange for students, scholars, teachers and scientists.
- since 2010 **Studienstiftung des Deutschen Volkes** Studienstiftung, Bonn, Germany
The *German National Academic Foundation* grants prestigious scholarships to students of outstanding academic achievements.

Professional Experience

- 2014 **Google – Software Engineering Intern** New York City
Developed new algorithms for large scale production monitoring system to support more complex queries. [Algorithm design, large scale software development, profiling, C++]
- since 2013 **University of Washington – Research assistant** Seattle
Co-developing Myria, a distributed database for scientific Big Data. Project led by Magdalena Balazinska, Bill Howe, and Dan Suciu. [Research, distributed systems, Java, Python, JavaScript]
- 2012–2013 **Open Knowledge Foundation – Intern and Developer** London, UK and Berlin, Germany
Two-month summer internship and subsequent one-year involvement in development and training for CKAN, the most deployed open data portal in the world.
[Distributed teams, agile development, large legacy systems, Python, JavaScript]
- 2012–2013 **Hasso Plattner Institute – Bachelor's Project** Potsdam, Germany
In a team of four students developed a tool to visualize software evolution with 3D Voronoi Treemaps. I focused on theory and implementation of the layout algorithms.
[Legacy code, visualization, complex algorithms, C++]
- 2012 **University of Potsdam – Research Assistant** Potsdam, Germany
Worked on theory and implementation of an extension of the Clasp Answer Set Programming solver for pseudo-boolean constraints. In Knowledge Representation and Reasoning Group with Professor Torsten Schaub. [Research, benchmarking, logic programs, C++]

Peer-reviewed Publications
